Arpitha S

Quality Assurance Testing (QA)

arpitha.shree2001@gmail.com +91 9066150651 www.linkedin.com/in/arpitha-s-0752771a1

Detail-oriented and highly motivated Software Testing Professional with hands-on experience in Manual and Automation Testing. Proficient in identifying defects, designing and executing test cases, and ensuring high-quality software delivery through Functional, Regression, Integration, and API Testing. Skilled in using testing tools and technologies including Postman, Selenium (Java), Playwright (JavaScript), Azure DevOps, and Jira. Strong knowledge of SQL for database validation and effective defect analysis. Adept in Agile methodologies, with excellent analytical, problem-solving, and communication skills. Committed to continuous learning and delivering reliable, defect-free software solutions.

Skills

- **Software Development Life Cycle (SDLC)** and **Software Testing Life Cycle (STLC)**
- **Manual Testing** and **Automation Testing** using **Playwright (JavaScript)** and **Selenium (Java)**
- Expertise in **Functional Testing**, **System Testing**, **Integration Testing**, **Regression Testing**, **Exploratory Testing**, **Smoke Testing**, **Sanity Testing**, and **Ad-hoc Testing**
- Skilled in **Test Case Design**, **test case execution**, and application of standard **test design techniques**
- Experience in writing and executing **automation scripts** using **JavaScript with Playwright** in **Visual Studio Code**
- Proficient in **CSS Selectors** and **XPath axes** for element identification in UI automation
- Familiar with **Defect Tracking** and **Defect Life Cycle** management using **Azure DevOps**
- Participated in **Daily Scrum meetings** and followed **Agile methodologies**
- Strong understanding of **Core Java** and **Object-Oriented Programming (OOPs)**
- Hands-on experience in **API Testing** using **Postman** and **Swagger**
- Practical experience with **SQL**: writing queries, joins, subqueries, aggregate functions, and stored procedures
- Knowledge of **Data Definition Language (DDL)** and **Data Manipulation Language (DML)**
- Basic knowledge of **HTML** and **CSS** for web testing and debugging
- Familiar with **Git for version control** and **GitHub** for repository management and collaboration

Experience

Manual & Automation Testing -iVoyant System Pvt Ltd *Sep 2024- Mar 2025*

- Gained hands-on experience in software testing processes including test planning, execution, and defect reporting.
- Performed manual testing across web-based applications to ensure functionality, usability, and reliability.
- Practiced API testing using Postman, verifying endpoints, response data, and error handling.
- Learned automation basics using Playwright to enhance test efficiency and coverage.
- Documented and maintained test cases and reports to track test outcomes and bugs.
- Actively participated in team meetings and collaborated with developers and testers to enhance product quality.
- Familiar with Agile methodology and tools like Azure for bug tracking and task management.

Project

1. HRMS (Human Resource Management System)

- Built a full-fledged HRMS to streamline employee onboarding, attendance tracking, and asset management.
- Enabled employees to input personal/professional details and upload documents during onboarding.
- Developed asset management features to monitor status (Assigned, Available, In Repair, Not in Use) and handle reassignments/returns.
- Provided admins with tools to manage employee attendance, leave requests, and record verification.
- Implemented role-based access control for data security and proper module segregation.

2. Case Manager

- Designed a Case Manager module to manage employee-related cases through predefined workflows.
- Enabled case creation, assignment, status tracking (Open, In Progress, Escalated, etc.), and resolution.
- Integrated notifications for updates and deadlines to improve response efficiency.
- Implemented filters/search features and role-based access for secure and efficient case handling.
- Maintained activity logs to track progress and ensure accountability.

3. Community Central Project

- Developed a community platform with features for user registration, login, and profile management.
- Enabled users to create and engage in forums, Q&A, and categorized community posts.
- Integrated interactive features like likes, comments, and replies for active engagement.
- Built an admin dashboard for managing users, content moderation, and activity tracking.
- Ensured role-based access for users, moderators, and admins to maintain platform integrity.

Education

Bachelor of Engineering from Bapuji Institute of Engineering and Technology (VTU) *2023*

Diploma -Engg from Bapuji Polytechnic Shabanur, Davangere *2020*

Matriculation from St. Paul's Convent Girls High School, Davangere *2017*

Declaration

I here by declare that the information furnished above is true to the best of my knowledge .
